PRESS RELEASE: DRIVE PRODUCTS ANNOUNCES TWO NEW LOCATIONS IN ATLANTIC CANADA AND WISCONSIN, USA

Further expanding our footprint in Atlantic Canada, Drive Products has purchased land in the city of St. John's, Newfoundland. The land is in a developing commercial business area near many of our truck dealer partners and easily accessible to local customers.

Currently the land is being prepped for development and plans for a brand new 15,000 Square Foot facility is being designed to feature a 7-bay truck shop, driveline, fabrication, hose and cable divisions all supported by a full warehouse and ample outdoor space for trucks and truck equipment. The development of Drive Products Newfoundland bolsters our commitment and goals of providing a true coast to coast support for our national and local customers in Canada.

Drive Products is very excited to continue our growth in Atlantic Canada and will provide more information to our customers in the near future.

Another marquee expansion for Drive Products is the acquisition of Elkhorn Driveshaft Company in Wisconsin, USA. Elkhorn Driveshaft Company has been known since 1912 by providing industry leading driveline products and repair services.

As part of the acquisition, Drive Products intends to continue to build upon Elkhorn Driveshaft Company's success while utilizing the synergy with Elkhorn Driveshaft to strengthen the distribution of our CDT Driveshaft product line in the US Market. In addition, the partnership will allow Elkhorn to expand its capabilities and breath of products to offer into their local market.

Akin to those of Drive Products operations in Canada, Elkhorn Driveshaft Company will receive the necessary support to develop its core competencies. This will include products and related services that feature DP Manufactured Brands of Voth Truck Bodies, Kargo King, Snowbull, and Big Max via Drive Products newly established regional Upfitting Division.

Drive Products is excited to work with Elkhorn Driveshaft Company to further develop the Drive Products brand within the USA. For more information about Elkhorn Driveshaft Company – visit <https://www.elkhorndriveshaftcompany.com/>
