PRESS RELEASE: DRIVE PRODUCTS NOW OPEN IN WINNIPEG, MANITOBA

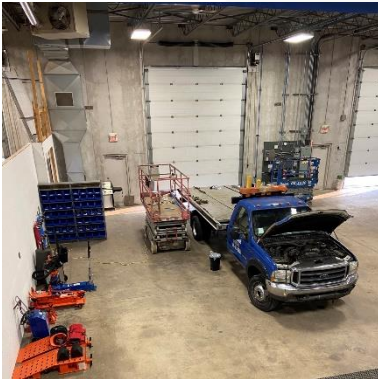

Drive Products is now open for business in Winnipeg, Manitoba. We first announced a Winnipeg branch back in the spring. In that time, our team in Manitoba has been working hard to establish our new branch location in the province.

Drive Products – Winnipeg is a key addition to our national footprint. We are now represented from coast-to-coast with brick-and-mortar locations in all industrial regions of Canada. As a major transportation hub in Canada and the “Gateway to the West”, Winnipeg has remained a strategic market for Drive Products since the late 80’s. We’re thrilled to return to the province, providing better coverage, support, and new products

to our local and national customers.

Drive Products – Winnipeg joins the growing DP branch network, offering best in class products, solutions & services to the regional market. Our Winnipeg offerings include *PTO & Hydraulics, Bulk Transport, Driveline, Snow & Ice Equipment, Winches*, and our vast portfolio of *Truck Equipment*.
