PRESS RELEASE: DRIVE PRODUCTS USA – EXPANSION IN ELKHORN, WISCONSIN

Drive Products is very excited to announce that we have a new facility in Elkhorn, Wisconsin. The additional 55,000 sq. ft. of space will be the new headquarters for Drive Products USA with master distribution, truck upfitting services, driveline services, and manufacturing for related DP manufactured brands such as Voth Truck Bodies, Kargo King, Bigmax Roll-Offs, CDT Driveshafts and more...

Subsequently Drive Products will integrate our existing operations at Elkhorn Driveshaft Company within Drive Products USA consistent with our plans of transforming Elkhorn Driveshaft Company into full-line truck equipment upfitter. Local customers and new prospects will now truly have the benefit of accessing all our brands and products with support from a full-scale Drive Products facility akin to the Canadian market.

In addition, longtime member of Drive Products, Ryan Prout will assume the role of Branch Manager of Drive Products – USA. Ryan brings 10 years + of experience in operations management and most recently was our General Manager at our Etobicoke GWA facility. Ryan will work alongside our existing Drive Products USA team to build up our capabilities in distribution, upfit, and manufacturing.

969 Koopman Ln, Elkhorn, WI 53121, USA
