**PRESS RELEASE: UPDATE – VOTH'S WESTERN MANUFACTURING NOW PLANNED FOR MORDEN, MANITOBA**

In February we announced that our manufacturing division Voth would be expanding its operations in Western Canada. Originally planned for the city of Regina, we are now breaking grounds in Morden, Manitoba due to strategic purposes. Drive Products Regina will continue its growth consistent with all our branches in delivering Upfitting and Distribution services.

Meanwhile in Morden, we will be building a brand new "Voth West" manufacturing facility that will produce a mix of truck bodies and truck mounted equipment to support the strong demand in Canada's Western Markets.

In addition, this will create more manufacturing capacity to support our continued growth and expectations for the future.

We are very excited to serve and contribute to city of Morden. We will provide more updates as the project moves forward. See you soon!
