## **Drive Products Partners with HMF GROUP**

We are very excited to announce our Partnership with HMF GROUP one of the world's leading manufacturers of truck-mounted loader cranes. Founded in 1945, HMF began manufacturing cranes in 1952 and has been exporting to more than 30 countries worldwide. With over 70 years of development, HMF cranes are world class and is known for their: High lift-to-weight ratios, clean design, low tare weight, strength, durability, and their original industry leading vehicle stability system known as EVS.

Drive Products strives to align itself with world class manufacturers that value user experience and has end-to-end quality assurance throughout its manufacturing process.

The addition of HMF Cranes to our growing portfolio of truck body & equipment products, combined with our branch network will further enhance our ability to build better work trucks for a wider range of end-user segments. We're very excited to develop new opportunities while continuing to service and offer existing customers innovative solutions that help optimize the performance of their work truck fleet.

As an HMF partner, Drive Products will be the sole Canadian distributor and will provide sales, upfitting, and related crane service support across our growing footprint of upfit facilities in Canada. Drive Products currently has inventory on the ground ranging from 3 to 31 tm cranes with plans to expand into larger lifting capacities.

We are building demo units as we speak and look forward to demonstrating the "Power to Lift" of HMF Cranes to the Canadian market.
