## NEW GROWTH COMING FOR DRIVE PRODUCTS: REGINA

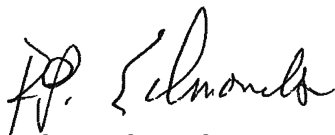

We are excited to announce that Drive Products has acquired 5 acres of prime industrial land in Regina, SK.

Located in the Sherwood business park, this newly acquired land will allow for the expansion of our existing Regina branch and will also serve as the future home of our new Voth Western Canada Manufacturing Centre. The expanded Drive Products: Regina will be a full spectrum operation, housing our Manufacturing, Upfitting and Distribution Operations.

In addition to offering the full suite of products and services currently offered by Drive Products, Drive Products: Regina will serve as “Voth West”. The Voth Western Canada Manufacturing Centre will manufacture a mix of truck mounted equipment with strong demand in Western Canadian markets while also providing the additional manufacturing capacity to support current growth rates.

By securing this land, Drive Products continues its commitment to our strong Western Canadian customer base. Additionally, this expansion represents a continued investment in our future in the West.

We look forward to bringing you updates as the project continues to take shape.
