

Kargo King Roll-Off System Announces International Distributor Agreement with Truck Hydraulic Solutions in Australia

Kargo King Roll-Off Systems is pleased to announce our International distributor agreement with Truck Hydraulic Solutions in Australia.

Truck Hydraulic Solutions is a growing National company with sales & service workshops in Sydney, Melbourne and Brisbane, specialising in the design, supply, fitment and commissioning of hydraulic systems. Quality for THS means aligning themselves with quality manufacturers such as OMFB PTO's, pumps and valves, Di Natale Bertelli underbody cylinders, Hidromas trailer cylinders and OMSI split shaft units and heavy-duty clutch drives.

THS provides design, supply and fittings services for diverse applications including tipplers, cranes and hook lifts, vacuum tankers, water tankers, gas tankers, tilt trays and more. THS facilities in Sydney, Melbourne & Brisbane are run every day by joint company Directors - Ronnie and Mat, who have been in the industry for over 25 years. This depth of experiences ensures that THS customers are talking to industry professionals who know the market, know the products and know the applications.

Kargo King Roll-Off Systems are renowned internationally (Canada, USA, Australia & UK), for providing rental fleets with the ability to safely load and deliver rental equipment at ground level. Serving truck fleets from light to medium duty truck chassis, this new working relationship with THS will allow Kargo King to better reach and service the Australian market. THS will be providing the complete Kargo King line to their customers, including the Kargo King Rental System, Detachable System (Roll-Off System with Interchangeable Bodies), and Tow System.
