

Press Release: Drive Products named Canadian Distributor for Sterling GP

We're excited to bring another innovative solution to the equipment transport industry as the Canadian distributor for Sterling GP's Plant Bodies. Based out of the UK, Sterling GP has 20+ years of success behind their name. The "higher standard" when it comes to manufacturing, design, and quality. Sterling GP has been building an enviable reputation in the industry as the pound for pound best in class for equipment transport solutions.

Why Choose a Sterling Plant Body?

Increased Payload Capacity

Extensive use of high tensile steels provides an increase in payload, strength, and weight savings. Sterling's Plant Bodies have proven to be lighter and stronger than equivalent beavertail decks out in the market.

Low Cost of Ownership

High Quality Steel Components with galvanized finish for added durability. Save on effort and fuel with a self-contained electric-hydraulic system to operate the ramp.

Versatility

Designed to accommodate the variety of rental equipment while dramatically improving loading safety with a uniquely shallow loading angle.
