PRESS RELEASE: DRIVE PRODUCTS USA GAINS NTEA MVP MEMBER STATUS

NTEA – The Association for the Work Truck Industry recently recognized Drive Products USA for completing a rigorous qualification process, demonstrating successful implementation of defined business standards and conformity to applicable government regulations. Achieving MVP status validates our efforts to improving the work truck industry through professionalism, knowledge and performance.

Because standards don't raise themselves, MVP acknowledges the companies that are leading the industry to excellence. Drive Products USA's MVP member status reflects our ongoing commitment to quality.

NAFA Fleet Management Association acknowledges the value MVP brings to the industry and has officially recognized the program since 2011. Fleet managers and truck dealers know truck equipment manufacturers and distributors with MVP status have embraced specific business and quality measures and comply with federal requirements.

A special thanks goes out to our Drive Products – Elkhorn branch and the rest of our dedicated team members driving our operations in the USA.
