PRESS RELEASE: DRIVE PRODUCTS OPENS NEW FACILITY IN NEWFOUNDLAND

In March of 2022, we announced our plans to break ground on a 4-acre lot situated in a popular commercial business area in St. John's, Newfoundland. This site would be home to a brand-new facility for our growing operations in Atlantic Canada.

This coincided with the recent acquisition of H & H Auto, a long-time Drive Products customer, Western Snowplow Dealer, and Voth Truck Bodies Distributor. This allowed us to establish a local presence and a temporary facility in Mount Pearl to service the local market.

Over the last year, our local team has been working diligently with the support of our national team to bring this facility online. Today we're happy to announce that **Drive Products – Newfoundland located at 30 Edmonds Place** is officially open for business.

Drive Products – Newfoundland boasts a 17,500 sq ft. building featuring:

- 10,000 sq ft. of Upfitting space
- 9 Service Bays and 1 Loading Dock
- 5,000 sq ft. Warehouse
- 2,500 sq ft. of Office/Showroom space.
- Ample parking for staff and customers
- A Fenced perimeter for safe storage and gated access to Truck Chassis and Truck equipment

Akin to Drive Products facilities in North America, Drive Products - Newfoundland will provide a diverse range of products and services to the local market such as PTO & Hydraulics, Bulk Transport, Driveline, Distribution, upfitting of Truck Bodies & Equipment, Snow & Ice controls, and related Truck Accessories and Winches.

A special thank you to the local Drive Products team in Newfoundland led by John Brillinger and John Diodati, and all those involved for their hard work and bringing this facility online.

We're very excited and look forward to bringing a stronger support network to Newfoundland and Atlantic Canada.
