

DRIVELINE SOLUTIONS

FOR HEAVY DUTY INDUSTRIAL APPLICATIONS

www.driveproducts.com

 **DRIVE**
PRODUCTS
SOLUTIONS / PARTNERS / SERVICES

Drive Products offers complete driveline solutions for heavy-duty industrial applications. Featuring in-house engineering, design, manufacturing, repair, and balancing services.

Our driveline expertise is used in military, oilfield equipment, pumping stations, on and off road vehicles, pulp and paper mills, steel mills, water treatment plants, marine, crushers, conveyors, cranes, elevators, fan drives, hoists, machine tools, and rail equipment for over 30 years.

Drive Products represents the finest global manufacturers of industrial U-joints such as Gewes, GWB, and Voith.

We stock virtually every size and style of Universal Shafts in our manufacturing facilities throughout the Drive Products network across Canada. We can fabricate new and recondition old units to meet your needs.

Drive Products is ISO 9001-2015 certified and certified by Transport Canada with the National Safety Mark.

We are looking forward to doing business with you in the near future. If you have any questions, don't hesitate in contacting us.

COMPLETE DRIVELINE SOLUTIONS FOR HEAVY-DUTY INDUSTRIAL APPLICATIONS

STEEL MILLS

- Cranes
- Continuous Casters
- Coil Boxes
- Seamless Tube Mills

ROLLING MILLS APPLICATIONS

- Steel beam reversing process uses adjustable stands for multiple shape possibilities
- Driveshafts are used in most cases

VERTICAL EDGERS

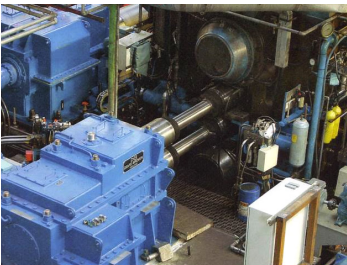

- All steel beams, plates or bars are made using machines with adjustable capacities
- Almost all use drive shafts in their process

MARINE APPLICATIONS

- Drive shaft with classification of DNV
- Assembly certified by the Canadian Coast Guard in our shop

PUMP STATION

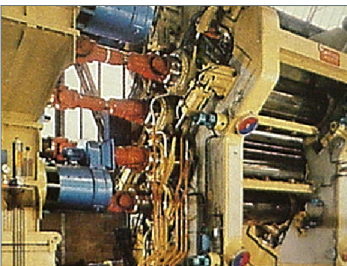

- City water treatment
- Multiple drive shaft assembly layout

MINING TRUCK CARRIER

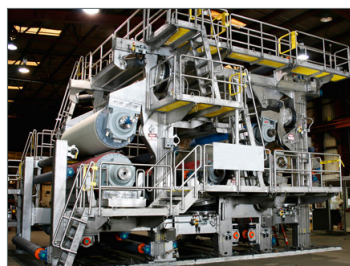

- Diesel powered engines
- Drive shafts are primary power transmission components

PRINTING INDUSTRIES

- Offset printing
- Quick disconnect couplings

PAPER MILLS

- Wet end
- Press section
- Coating section
- Dryer section
- Winder section

NORTH AMERICAN FRAC RIG DESIGN

- Frac pumps may be body mount trucks, skid units or trailer mounted and can range from 800HP to 3000HP depending upon well formation.
- Most widely built units currently use a 2500 HP diesel engine with a 7 to 9 speed transmission driving a positive displacement triplex or quintuplex positive displacement pump.
- GWB 390.60 and 390.65 cardan shafts are used on a majority of new rigs.

MEGA-SHREDDER MARKET

- High Horsepower
- Over 10,000HP on latest installations

Services

Installation

Every Drive Products location provides full installation facilities to integrate our products and systems into your work vehicle.

Maintenance & Repair

Every Drive Products location has service facilities for our products and systems. Whether it is a warranty repair, retrofit, or system troubleshooting, we have the experts to aid in diagnosing the problem and getting your vehicle back to work.

Manufacturing

Drive Products has manufacturing and assembly expertise in driveline, control cables, custom consoles, hose assemblies, Power Take-Offs, and hydraulic valves, pumps, and motors. We can meet the needs of both the OEM and retail marketplace through our state-of-the-art equipment and facilities.

System Engineering & Design

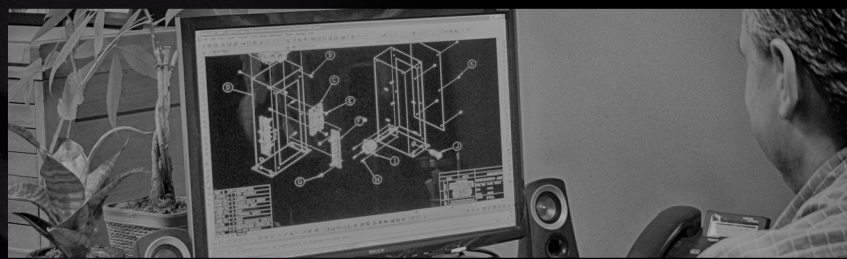

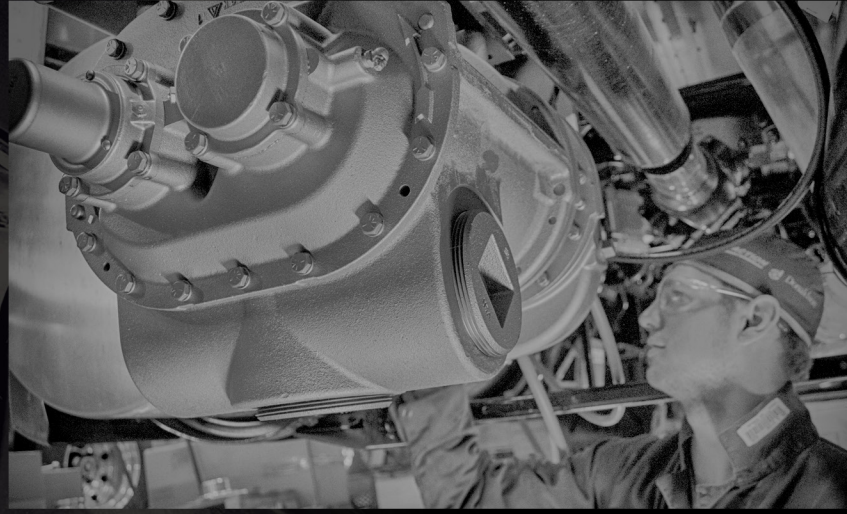

Drive Products has technical experts capable of designing complex systems, with the experience and expertise to aid in product selection and integration to meet any mobile or industrial power equipment needs.

Fleet Programs & Services

Inquire with us today on how you can leverage our national presence and team of experts for your fleet requirements.

Custom Vehicle Rig-Ups

Drive Products provides custom designs, fabrication, and manufacturing to suit all your winning requirements. Whether it is tri-drives, Texas rigging, or bed trucks, Drive Products can accommodate your needs.
