# DUMP INSERT

## SIGNATURE DUMP INSERT DESIGN

- Built for your 6'6" or 8" Pick-Up Bed
- 21" Side Wall Height
- 21" Tailgate Height
- Steel Subframe for Superior Support

Voth's signature dump insert design is available in standard steel or aluminum. With a smooth understructure and low mounting height, Voth's Unibody design is created for heavy-duty service, without turning your truck into an oversized dump truck. The low-mounting height of this Unibody allows for a low center of gravity and increased stability on the road and on the job site. The original all steel Unibody provides a heavy-duty, hard-working truck design without sacrificing efficiency and functionality. Joined by it's all-aluminum counterpart, the aluminum Unibody offers increased payload capacity and fuel efficiency.

## MANUFACTURING

Voth Courtland Manufacturing Facility: 92,000 sq.ft

Morden Manufacturing Facility: 56,000 sq. ft

Windsor Manufacturing Facility: 85,000 sq. ft

Voth Truck Bodies serves Canada and the U.S. with steel, aluminum, and hybrid truck bodies. Supporting a variety of industries, Voth has built a strong relationship with the landscape and tree care industries with their unibody dump body design and a range of chipper body and forestry body designs. A member of Drive Products Manufacturing, Voth Truck Bodies are now manufactured in three facilities across Canada. In addition to Voth's signature line of truck bodies, these facilities also manufacture Kargo King Roll-Off Systems, Big Max Roll-Off Systems and more.
